

Mixed Reality with Molecules

modlab

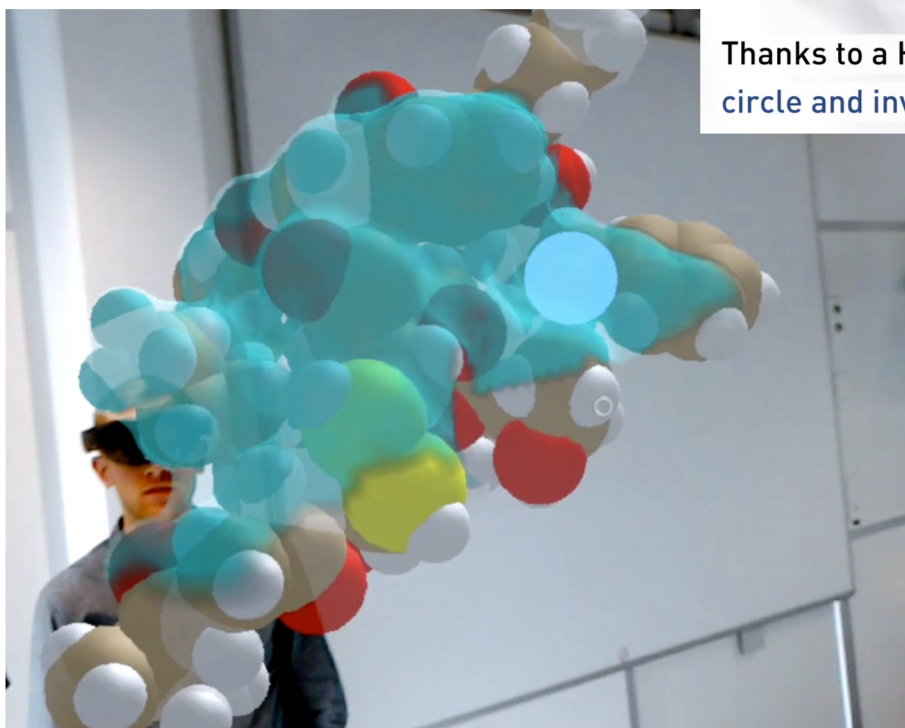

Futuristic meditation exercises at ETH?

Join us for a journey into the world of molecules!

Using the app *MoleGram* the Modlab team will introduce you to a new perspective on the world of molecules around and within us.

Thanks to a HoloLens, students can circle and investigate a virtual protein.

Peak under the surface of proteins.

Become a water molecule and create your own solvent accessible surface of the protein.

Investigate protein structures from individual angles.
